Summary

Passionate and driven professional with a deep love for Linux System Administration and Android development. I am constantly inspired by the endless possibilities these fields offer, and I thrive on exploring innovative solutions and pushing the boundaries of technology. With expertise in managing robust server infrastructures and crafting seamless user experiences, I am dedicated to staying at the forefront of emerging technologies. Let's connect and embark on a journey to redefine what's possible in the world of technology.

Experience

❄️ Linux System Administrator

شرکت متن‌باز سامان MBSCO

Jun 2022 - Present (2 years 3 months)

- Implemented OKD (Origin Community Distribution of Kubernetes) in an air-gapped environment using User-Provisioned Infrastructure (UPI), demonstrating expertise in complex container orchestration deployments.
- Installed and configured Bareos (Backup Archiving Recovery Open Sourced) to implement automated backups, significantly enhancing data loss prevention and recovery capabilities.
- Customized Zabbix to monitor customer infrastructure from hardware to application layers, improving system visibility and proactive issue detection.
- Successfully configured Fail2ban behind a reverse proxy to secure email server.
- Diagnosed and resolved issues with Linux systems and network connections, ensuring stable and reliable operation.

Education

🦅 Islamic Azad University

Bachelor's degree, Computer/Information Technology Administration and Management

Jan 2016 - Jun 2022

Skills

Linux System Administration • Git • Zabbix • OpenShift • Bash • Ansible • Bareos
